

HFA100 - HDTV for FREE

HDTV just got easier with the Humax HFA100 HDTV Tuner. The HFA100 enables TV viewers the ability to watch and listen to stunning High Definition broadcast TV. This advanced, yet simple to operate tuner connects to nearly all HD ready monitors and delivers the most intuitive user experience available. Setting it aside from the competition is an easy to use on-screen setup guide, direct channel access and automatic channel scanning while in standby mode. This addition to the Humax Easy Digital family of products brings broadcast TV to life. It's just another example of ground breaking technology delivered by Humax, the Easy Digital company!

HFA100

HDTV Tuner

HFA100

HDTV Tuner

Connect the HFA100, HDTV tuner to virtually all available HD monitors, regardless of brand or connector type with a wide array of connectivity options that include Component Video, RGB and a pure digital HDMI interface. Boasting a full screen and mini EPG, the HFA100 also allows for users to manually add channels that were not detected during the guided channel set-up. Additionally, this is one of the smartest HDTV tuner on the market... when not in use the HFA100 looks for newly available digital channels automatically while in standby mode
